COTONEASTER

** 750 divaricata (Spreading Cotoneaster), 2 yr. T, 15-18" \$.30 \$.25
1,000 horizontalis, 2 yr. T .50 .45

* - * - * - * - * - * - * - * - * - * - * - * - * - * - * - *

- COTONEASTER PRAECOX -

* This is one of the hardiest Cotoneasters and went through 20 degrees *
- below zero without any harm. It has large berries like cranberries -
* which color up in the middle of August and remain on until very late *
- Fall. It grows rather flat and makes an ideal plant to mix in with -
* foundation plantings, especially around ranch type houses. It also *
- makes an ideal low spreading hedge. -

* 1,500 2 yr. T., 6-12" .50 .45 *

RHUS COTINUS ROYAL PURPLE

* (New dark purple-red leaf Smokebush) *

- A number of varieties of Smokebush have been tried out in the nursery with
 * Royal Purple always turning out to be the most outstanding. I am convinced
 - of this to the extent that it is the only one now being propagated at the
 * nursery. Royal Purple keeps its rich dark purple reddish foliage from
 - Spring to late Fall. In late summer the matured leaves show a mottled edge
 * which is a light red edge around the dark purple leaf. It is an outstanding
 - plant in that it draws the attention of all who visit the nursery and is
 * greatly admired for its brilliant foliage. The foliage is darker than any
 - red Japanese maple. The plant is adaptable for use as a lawn specimen es-
 * pecially in locations where the Japanese Maple is not hardy. Royal Purple
 - is the only Purple Smokebush to receive a Certificate of Merit from the
 * Royal Horticultural Society. The branches make an excellent filler for
 - bouquets.
